<tbody>
<tr>
<td>Learning Level:</td>
<td>Beginner, Intermediate, and Advanced</td>
</tr>
<tr>
<td>Module Description:</td>
<td>Many museums, archives and cultural institutions have digital collections. This module focuses on tools, resources, best practices, and descriptive standards for building a robust digital collection program and structuring digital collection projects correctly covering common decision points in digital project planning, project implementation, and long-term maintenance of digitized records.</td>

Learning Objectives

Upon completion of this module, you will have gained the skills and practical knowledge to successfully assess existing and potential digital collections, review recommended digitization tools and equipment, and be introduced to digital preservation practices.

Intro Session

Thinking about tackling a digitization project? Join this introductory session to hear from museum staff who successfully conceptualized, planned and implemented projects to expand the online presence of collections. Presenters will share different approaches to digital projects and discuss goals, budget (or lack thereof,) planning process, partnerships and technologies utilized to turn museums inside out and make collections accessible online.

Technical Workshop 1

The first technical workshop will address the “why” and “who” of collections digitization projects - why your digitization project matters and to whom; the importance of defining your digital collection project’s purpose, audience, and interfaces; the role of digitization in your museum’s access strategies and how communities will use your digital collection; how to use metadata for findability and to support public use/access.

Technical Workshop 2

Now that you know why, how: How do you plan a successful project, where do you start, how do you identify priorities? What should you include? Should you digitize in-house or use a vendor? What are your short- and long-term goals and considerations? Tech workshop 3 in the Managing Digitization Projects module will address these questions and offer tips for digitization project managers as they get started.

Technical Workshop 3

Let’s get down to the nuts and bolts of how to work with the resources you have to achieve your digitization goals. During Tech Workshop 3, we’ll take a look at equipment and space setups; technical imaging standards and how these standards contribute to long term digital preservation plans; tools for ensuring that the digital files have the longest lifespan possible; an overview of QA/QC models in the cultural heritage imaging field; and how to scale up over time.
# Module Contributors

These are the experts and presenters who are involved in the development and presentation of each session, workshop, resource, and activity you find within this module.

| Ann Stegina  
Senior Collections Manager, Anchorage Museum |
<table>
<thead>
<tr>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>Ann Stegina moved to Alaska in mid-2019 to be the senior collections manager at the Anchorage Museum. She started her museum career in 2009 and has worked as the senior collections manager at the Intrepid Sea, Air &amp; Space Museum and registrar at the South Street Seaport Museum, both based in New York City. Ann has a BA from New York University in Anthropology and Spanish. She earned her MA in Museum Studies from Johns Hopkins University. She is an enthusiastic learner and interested in under-told histories.</td>

| Carolyne Hart  
Marketing and Membership |
<table>
<thead>
<tr>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>Carolyne Hart joined the museum staff in April 2017, moving from Fort Collins, Colorado to lead Marketing and Membership Development. Her focus is raising the museum’s visibility as a tourist destination and in the art community, and as a favorite place for locals and SDSU students and staff to come with family and friends. Also important is developing membership and sponsorship programs that encourage people to support the museum financially and with their time and influence.</td>
</tr>
<tr>
<td>Finding creative ways to communicate and connect people has been the hallmark of Carolyne’s career. During her 24 years with Hewlett Packard (HP), Carolyne led strategic marketing and business development project teams throughout Asia, Europe and the United States. In 2007, she followed a creative passion, launching Pressed In Press® where she designed and published devotional gift books featuring her own photography and over 50 family heirloom books that honor past generations, preserve memories for current generations and impart vision to future generations.</td>

Working at the intersections of Public History and archives, Dr. Rhonda D. Jones is an international scholar who specializes in cultural memory and digital heritage informatics. Currently working as a Community Digital Archivist at Special Collections and University Archives at the University of North Carolina-Greensboro, she is passionate about reducing barriers to information by addressing the capacity gaps of cultural heritage traditions in underrepresented communities. Whether the task is teaching, conducting research, scheduling programs, audience engagement, public relations, or public speaking, her work centers on managing innovative research projects that help individuals and community organizations document and preserve their own history.

Lindsey Richardson has more than 20 years' experience working with museum collections in all kinds of museum settings, including history, art, university, municipal, historic house and children's museums. She has planned and implemented major collections projects involving digitization, cataloguing, moving to other locations, deaccessions, inventory and rehousing, as well as written grants to fund those projects. Lindsey also consults with museums about strategic planning, collections and digital collections assessments, grant-writing and interpretive projects such as exhibits or object-based programs. She has anthropology degrees from Harvard and Oxford, and has worked with museums on three continents. To learn more please visit her website: museumperson.com.
Elizabeth Chiang is a professional photographer who specializes in cultural heritage imaging. With over fifteen years of experience in non-profit and private sectors, Elizabeth has extensive expertise in studio photography, image colour management, and has an ongoing interest in streamlining digitization workflows. She is currently the staff photographer at the George Eastman Museum, where she manages the studio and is in charge of digitization initiatives at the museum. Elizabeth is a member of the Rochester chapter of the Society for Imaging Sciences and Technology. She holds a Master of Arts in Photographic Preservation and Collections Management from Ryerson University.

On the Museum Learning Hub, you’ll find a variety of free sessions, workshops, and resources that are similar in subject matter and content. We recommend the following Museum Learning Hub sessions and modules:

<table>
<thead>
<tr>
<th>Session/Module</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Digital Accessibility and Inclusion</strong></td>
<td>Digital accessibility ensures access to information and all functions of digital tools, irrespective of a person’s specific needs. This module will provide training on how to integrate accessibility and inclusion into digital programs, social pages, and websites.</td>
</tr>
<tr>
<td><strong>How to Create/Present Virtual Exhibitions</strong></td>
<td>Digital exhibitions can offer unprecedented access to museum collections that might never be seen otherwise except by those with physical access. This module will explore how to build an online exhibition and introduce open-source and free software tools available to create exhibition narratives and layouts for online display.</td>
</tr>
<tr>
<td><strong>How to Digitize 3D Collections</strong></td>
<td>There are many advantages to the digitization of museum collections including making collections more accessible and providing an option for museum professionals to handle and examine replicas of fragile artifacts, aiding in long-term preservation. The first step to starting any digitization work is to scan an object. This module will focus on the particulars of scanning three-dimensional objects and volumetric spaces.</td>
